Warning: Don't Fall Victim to This Trap

Many companies offering business blogging software or lead generation website solutions require that you use their custom, proprietary software.

They often require a long term monthly commitment and a set up fee as well.

Then, if you decide their solution is not for you, the task of moving your site, articles and content is extremely difficult, costly and could cost you lost leads because your search engine ranking may go down when you move the site.

Do not get into this kind of marriage without doing your homework and understanding the full commitment.

Buzzoodle is different. Your lead generation sites are on top performing open source solutions that you control. **And there is NO long term commitment – cancel any time.**

Your lead generation websites are set up and hosted by you – our tools and training just make them easier and more effective. If you stop using our services, your lead generation websites that you set up do not need moved or changed – they still keep working for you.

A Risk Free Lead Generation Program

The Buzzoodle system is risk free. If you do not find that the system is producing leads like you expected after giving it an honest effort, simply let us know and we will cancel your monthly membership – and you keep the sites you set up, the links we built for you, the articles our system created for you, your lead generation templates and your knowledge of how to build lead generation engines.

Try Buzzoodle Lead Generation for 30 Days.

Lead Generation Websites take more than
30 days to start producing leads in many cases.

However, if you decide the strategy is not right
for you within your first 30 days, simply submit
a request for cancellation and we will refund your
first month's membership fee.

The only thing you have to lose is more leads.

P.S. You might be surprised to find that this was built first because I wanted to better manage my publishing strategy online. I wanted to make it easier to target keywords, outsource writing and manage links.

P.P.S. The majority of our clients are small business owners or marketers and are NOT technical.

P.P.P.S. One Client got so many new customers after a few months that they hired a writer for their small business. This system makes it very easy to write or hire writers and manage them.
